Fall 2019 | 14 New Series

120 New Titles! • 14 New Fall 2019 Series • 6th–12th Grade Nonfiction

Addicted • Page 24

The trap of addiction ensnares millions. This series explores the struggles of those who have succumbed to addiction whether to opioids or social media or something else. It examines what it means to be addicted, how it occurs, the real-world effects, and the challenges of overcoming addiction. Personal accounts along with facts and quotes from authoritative sources are featured in every book as is an annotated list of organizations and websites where readers can get help and more information.

Art Scene • Page 50

The art world is ever changing. Although painting and sculpture still have a strong following, many of today's artists are making names for themselves in other art forms, including animation, tattoo, and even graffiti. The *Art Scene* series focuses on what some of today's new artists are doing, what they seek to communicate through their art, and how they are using new techniques and technology to create and promote their work. Each book introduces readers to influential artists and presents brief historical background as well as highlighting the work of a variety of contemporary artists and their art.

Career Exploration • Page 58

With so many career possibilities, how does one decide which path to follow? One way is to focus on the things one likes to do. Problem solvers might thrive as cybersecurity analysts or biomedical engineers, and people who like social interaction might enjoy social work or sales. The *Career Exploration* series profiles a variety of jobs and career fields that are well-suited to particular interests. Included in every book are comments from industry insiders, information about pay and job prospects, a Q&A interview, and a list of sources for more information.

Careers for Creative People • Page 54

STEM careers are all the rage, but not everyone wants to be an engineer or actuary. What is a creative person to do? The *Careers for Creative People* series explores careers for creative types in the fields of fashion, music, the culinary arts, film, and more. These easy-to-use guides give teens with a creative streak a variety of ideas for career search and planning in a variety of fields. What the jobs entail, what they pay, and future prospects are discussed along with insights from industry insiders—and a Q&A interview in every book.

Defining Events of the Twenty-First Century • Page 38

Defining Events of the Twenty-First Century examines some of the most important moments in pop culture, science, and society in the last two decades. From influential pop musicians to technological breakthroughs to tragic human-made and natural disasters, readers will explore a wide variety of key events and people, the context surrounding them, and how they affected the world. Each volume includes diagrams to enhance readers' understanding of complex concepts, source notes, and an annotated bibliography to facilitate deeper research.

E-Careers • Page 56

The digital world offers many new career opportunities—ranging from e-commerce and social media to info tech and online gaming. Teens who have an interest in working in the digital world will find useful descriptions, essential facts, and valuable opinions and advice in this easy-to-use series. The *E-Careers* series introduces readers to various career options within a given field and explores what the jobs entail, educational requirements, employment prospects, and more. All books in the series feature a Q&A interview with someone who works in the field. Lists suggesting sources for more information are also included in every book.

Emerging Issues in Public Health • Page 16

Opioid addiction has reached epidemic proportions. Firearm-related deaths have surged to the highest level in fifty years. Childhood trauma is now considered to be every bit as urgent as a natural disaster or outbreak of deadly disease. These are just three of the issues examined in the *Emerging Issues in Public Health* series. All books explore recent events and new ideas in an effort to explain what's taking place, why it matters, and what efforts are being made to address these and other public health issues. Personal accounts along with facts and quotes from authoritative sources help readers gain a vivid understanding of these issues from a public health perspective.

Exploring Greek Mythology • Page 40

The myths of ancient Greece live on in the *Exploring Greek Mythology* series. Villains, goddesses, gods, and heroes come to life in these volumes. The stories vividly illustrate the cultural values and customs of ancient Greek society. Sidebars, fully documented quotes, and full-color images add depth and insight.

Historic Disasters and Mysteries • Page 36

The mysteries and disasters of the past never grow old. Why the *Titanic* sank, how a volcanic eruption buried an entire city, what happened to an entire civilization (if, indeed, it ever existed), and the bizarre events surrounding a dramatic discovery in the desert still fascinate. These are the subjects explored in the *Historic Disasters and Mysteries* series. Each book explores what happened and why, what evidence exists to support these ideas/scenarios, the individuals involved, and the aftermath. Personal accounts, the observations of experts, and interesting facts add depth and perspective.

Intolerance and Violence in Society • Page 14

Intolerance and Violence in Society explores the many ways that intolerance and violence continue to permeate society, providing history behind why these problems exist and showing what people today are doing to help. Readers will learn about racial and cultural intolerance, religious intolerance, LGBT intolerance, sexual violence, and online bullying. Each volume includes diagrams to enhance readers' understanding of complex concepts, source notes, and an annotated bibliography to facilitate deeper research.

Music Scene • Page 49

The music world is ever changing. Although classical, rock, and jazz still have strong followings, many of today's musicians are making names for themselves in other music styles, including K-pop, EDM, and rap and hip-hop. The *Music Scene* series focuses on what today's new musicians are doing, what they seek to convey through their music, and how they are using new techniques and technology to create and promote their work. Each book introduces readers to influential musicians and presents brief historical background as well as highlighting the work of a variety of contemporary musicians and their music.

The Science and Technology of Sports • Page 30

No matter the sport, athleticism and hard work are central to athletic performance. But there is more going on when a person runs, jumps, kicks, or throws. Physical forces and biomechanical factors help determine speed, stamina, accuracy, and more. *The Science and Technology of Sports* series examines the biomechanics, physics, and mathematical principles that shape athletic performance and competition. How these factors influence training and common injuries is also discussed. Real-world examples and fully documented quotes bring concepts to life.

Teen Guide to Sports • Page 48

Teen Guide to Sports introduces the worlds of basketball, hockey, football, soccer, and baseball to high school athletes. Readers will learn about tryouts, exercises and drills, what coaches are looking for in players, and what life is like in collegiate and professional sports. Each volume includes quotes from professionals in the sport, informational sidebars, and source notes to facilitate deeper research.

Teen Life Skills • Page 52

A lot of teens have no idea how to dress for a job interview or how to arrange for utilities in a newly rented apartment or how to avoid running up a huge credit card bill. The *Teen Life Skills* series provides teens with a solid and practical introduction to, well, real life. Real-world examples, relevant facts, and fully documented quotes from teens and experts bring concepts to life for a down-to-earth look at topics including managing money, living on your own, and getting a job.

Hate Crimes

2019

(eBook)

978-1-68282-471-9 (472-6)

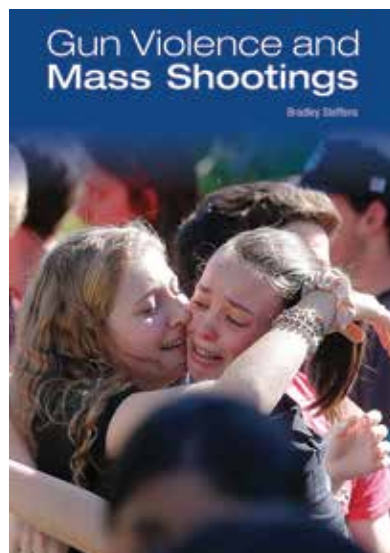

Hardcover: List ~~\$44.25~~

School & Library \$30.95

eBook Multiuser: \$41.95

specifications: • interest level grades 6–12 • 80 pages, 6.5 x 9.25 • reinforced library binding • full-color photos • sidebars • margin quotes • source notes • organizations • for further research section • index

Crimes committed against people because of their race, ethnicity, sexual orientation, or religion have become common in the United States. According to the FBI, more than six thousand such crimes were committed in 2016 alone. Hate crimes can range from vandalism, such as the desecration of headstones in a Jewish cemetery, to mass shootings, such as the 2015 murders of nine African Americans attending church services in Charleston, South Carolina. Although many laws have been written to prevent and prosecute hate crimes, experts agree that stopping such offenses from occurring will not be easy.

Gun Violence and Mass Shootings

2019

(eBook)

978-1-68282-515-0 (516-7)

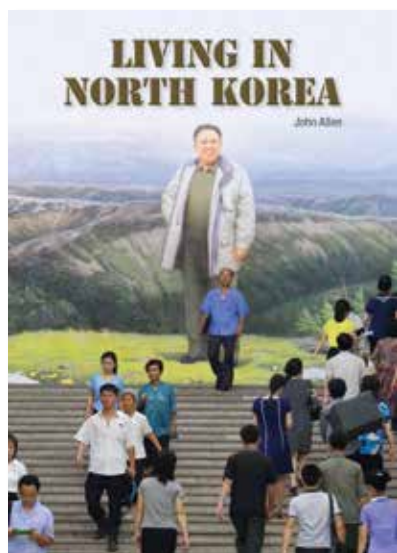

Hardcover: List ~~\$44.25~~

School & Library \$30.95

eBook Multiuser: \$41.95

specifications: • interest level grades 6–12 • 80 pages, 6.5 x 9.25 • reinforced library binding • full-color photos • sidebars • margin quotes • source notes • organizations and websites • for further research section • index

The mass shooting at Marjory Stoneman Douglas High School in Parkland, Florida, in February 2018 renewed the national debate over gun violence—a debate led by the students themselves. This book examines the prevalence of all types of gun violence in America and the factors—historical, cultural, and constitutional—that make this country an outlier among industrialized nations. It also explores possible solutions to reducing gun deaths and the controversies surrounding those proposals.

Living in North Korea

2019

(eBook)

978-1-68282-475-7 (476-4)

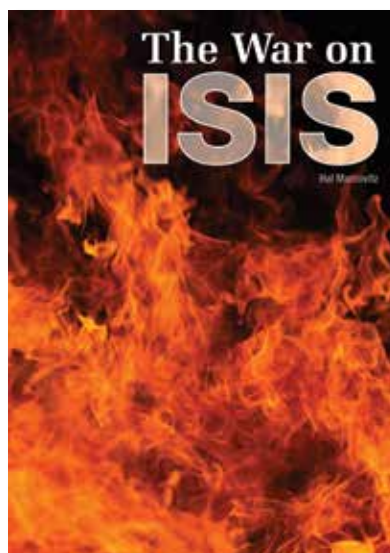

Hardcover: List ~~\$44.25~~

School & Library \$30.95

eBook Multiuser: \$41.95

specifications: • interest level grades 6–12 • 80 pages, 6.5 x 9.25 • reinforced library binding • full-color photos • sidebars • margin quotes • source notes • for further research section • index

Despite being a nation so frequently in the headlines, North Korea remains a mystery to most outsiders. Its leader, Kim Jong Un, rules a society marked by extremes, with government officials living in luxury while the general populace struggles to avoid starvation. This book examines the details of daily life under an oppressive and secretive dictatorship.

The War on ISIS

2019

(eBook)

978-1-68282-477-1 (478-8)

Hardcover: List ~~\$44.25~~

School & Library \$30.95

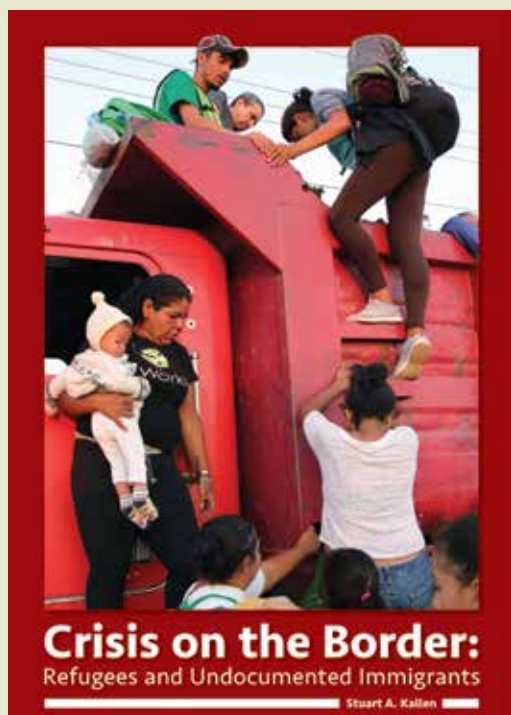

eBook Multiuser: \$41.95

specifications: • interest level grades 6–12 • 80 pages, 6.5 x 9.25 • reinforced library binding • full-color photos • sidebars • margin quotes • visual chronology • source notes • for further research section • index

For nearly four years the Islamic State in Iraq and Syria (ISIS) spread war and terror across the Middle East. ISIS saw itself as the ruler of the world's 1.8 billion Muslims, who would be forced to live under a caliphate based on seventh-century beliefs and laws. In 2015 the United States and some forty other nations launched a war against ISIS, making a stand against one of the world's most brutal terrorist groups.

Crisis on the Border: Refugees and Undocumented Immigrants

Grades 6–12 • Current Issues

The media regularly reports on border walls, migrant caravans, asylum seekers, and undocumented immigrants. But what are the stories behind the headlines? *Crisis on the Border: Refugees and Undocumented Immigrants* closely examines the people, the politics, and the policies driving one of the most controversial issues of the day.

Rehab or Punishment: What to Do About Drug Crimes

How should society deal with drug crimes? Many people support tough-on-crime laws and harsh sentencing guidelines to punish offenders and deter crime. Others question whether this is truly effective. An increasing number of people believe that rehabilitating offenders, especially those with drug addictions, will ultimately be more successful—both for the offenders and society.

• for further research section
• index

When opioids were developed a quarter-century ago, many physicians believed the drugs would help alleviate the pain caused by severe injuries and debilitating diseases. But while the drugs do deaden pain, they can lead to devastating addiction as well as death through overdose. Meanwhile, the opioid heroin continues to be a much-abused illegal drug that threatens the lives of its users.

Digital technology now connects people to each other and to all the world's information everywhere, at all times. This is changing the way people meet each other, fall in love, find jobs, learn new skills, take in news and entertainment, and build personal identities. Learn what these changes mean for society now and in the future.

Sharing Posts: The Spread of Fake News

2018

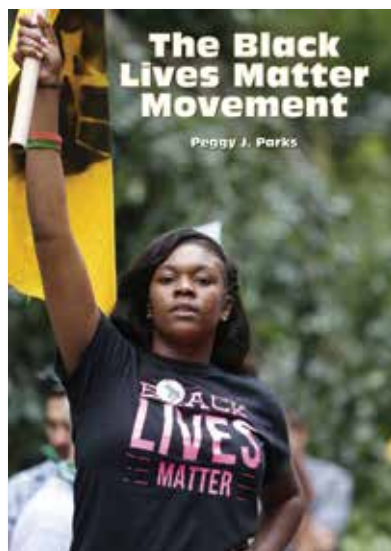

(eBook)
978-1-68282-297-5 (298-2)

Hardcover: List ~~\$44.25~~
School & Library \$30.95

eBook Multiuser: \$41.95

specifications: • interest level grades 6–12 • 80 pages • 6.5 x 9.25 • reinforced library binding
• full-color photos • sidebars
• margin quotes • source notes
• for further research section
• how to identify fake news section
• index

The rise of the Internet has changed the way news is reported and consumed. One effect of these changes involves fake news—false news items that are spread through e-mail and social media to discredit people and policies, most often in the realm of politics. This book examines the growth and influence of fake news in the United States and beyond.

The Black Lives Matter Movement

2018

(eBook)
978-1-68282-285-2 (286-9)

Hardcover: List ~~\$44.25~~
School & Library \$30.95

eBook Multiuser: \$41.95

specifications: • interest level grades 6–12 • 80 pages • 6.5 x 9.25 • reinforced library binding
• full-color photos • sidebars
• source notes • for further research section • index

Black Lives Matter was born in July 2013 after a jury exonerated the killer of an unarmed black youth named Trayvon Martin. Since that time it has become known as a formidable, often controversial, civil rights movement that seeks equality and fair treatment of black citizens by law enforcement and by society as a whole.

Fake News and the Manipulation of Public Opinion

Grades 6–12 • Current Issues

Fake news is not new, but thanks to the Internet and social media, it is spreading faster and farther than ever before. Fabricated stories are creating doubt and confusion and easing the way for the manipulation of public opinion. In some cases, websites and news articles are designed to confuse people into thinking that they are looking at trusted sources and factual stories. In other cases, the label *fake news* serves as a tool for discrediting unflattering accounts or opposing points of view. The result in all cases is public confusion that, many argue, threatens the foundations of democracy. *Fake News and the Manipulation of Public Opinion* presents a balanced but realistic view of what has been taking place, how, and why. It examines both the consequences of these actions and the efforts being made at all levels of society to end this problem.

Teen Guide to Student Activism

"A thorough guide for the next generation of activists."

—Booklist Starred Review, February 15, 2019

**New
Single
Title**

The student-led March For Our Lives movement, formed in the wake of the mass shooting at Marjory Stoneman Douglas High School in Florida, captured widespread attention in 2018. The raw emotion and eloquence of these student activists have made a strong impression on the nation and the world. Many other students in cities and towns all across the country have taken on other causes. Whether their efforts are local or global, whether they generate headlines or not—all of these student activists seek to create a better world for themselves and others. *Teen Guide to Student Activism* features stories about teens who are making a difference and shows other teens how they can do the same. The book discusses organizing, reaching out, and student rights. It also features insights from student activists about the challenges of balancing school and activism and the many lessons learned from their own activities and from earlier activists. The book includes many fully documented quotes from teens as well as an annotated list of Resources for Student Activists.

“A solid look into the complicated workings of policing and court rulings”

—*Booklist* on Threats to Civil Liberties: Policing, October 1, 2018

Speech, privacy, religion, policing, and voting are in the news for many reasons—one being the concern that civil liberties in these areas are under threat. The new series *Threats to Civil Liberties* examines what the various threats are, how they have come about, what actions are being taken, and why some of these responses are controversial. Readers will be exposed to a variety of voices—from the public, the courts, the government, the media, advocacy groups, and others. Pro/con sidebars highlight the controversial nature of these topics.

Discrimination in Society

Discrimination based on race, sex, age, and more is as prominent in the public discourse today as it ever was. The *Discrimination in Society* series examines these and other types of discrimination—what they entail, how they are manifested, how widespread they are, their effects on real people, and efforts to address these problems. Personal accounts and quotes from experts in various fields provide added insight into these timely topics.

Intolerance and Violence in Society

Grades 6–12 • Current Issues

Intolerance and Violence in Society explores the many ways that intolerance and violence continue to permeate our society, providing history behind why these problems exist and showing what people today are doing to help. Readers will learn about racial and cultural intolerance, religious intolerance, LGBT intolerance, sexual violence, and online bullying. Each volume includes diagrams to enhance readers' understanding of complex concepts, source notes, and an annotated bibliography to facilitate deeper research.

for physical evidence such as hair. The victim is also searched for internal and external injuries, which are documented with photographs and samples. All of this evidence is collected and stored in what is usually called a rape kit. These kits can provide powerful evidence in investigations of sexual violence. However, experts estimate that hundreds of thousands of these rape kits have never been tested in some cases, police departments collect the kits but do not send them away for DNA evidence. In others, the kits are sent away for testing that is not completed. Advocacy groups such as End the Backlog, which is run by the nonprofit Joyful Heart Foundation, ask for mandatory testing of these kits. The project has succeeded in raising funds to test unexamined rape kits.

SEXUAL VIOLENCE IN PRISONS
The United States has the world's largest population of incarcerated people. More than two million people are held in jails, prisons, juvenile correctional facilities, immigrant detention facilities, and other types of confinement. Prison inmates face very little power in their daily lives. People in prison are especially vulnerable to sexual violence by other inmates and by prison staff. The Bureau of Justice Statistics believes that more than 200,000 prison inmates a year are victims of sexual violence. People who are held in immigration and Customs Enforcement (ICE) detention facilities are also targeted for sexual violence and abuse. In 2010, the immigrant, or non-citizen, collected hundreds of accounts of sexual violence in these facilities. Many of these accounts involved sexual assault by guards and threats to harm someone else. Advocates believe that because many people held in immigration detention are afraid to report their abuse, the actual number of sexual violence incidents is much higher.

“The Human Rights in Focus series addresses difficult topics with levity, a clear tone, and solid research. . . . A strong resource for older students”

—Booklist, October 1, 2017

Do humans have innate rights? World bodies including the United Nations say the answer is unequivocally yes. What do those rights entail? How are they being violated? And what is being done to ensure respect for human rights for marginalized populations? These and other issues are examined in the *Human Rights in Focus* series. Vivid details and fully documented quotes add insight into these difficult issues. An appendix gives students ideas about how they can get involved.

Changing Families

American families are changing. New attitudes toward adoption, same-sex marriage, interracial relations, and more have influenced the makeup of families all across the nation. The *Changing Families* series helps young readers understand the experience of being part of a nontraditional family. Chapters examine the changes that are taking place, how young people within these families view themselves, and how they are affected by the views of outsiders. Each book also presents stories of well-known people who have grown up in nontraditional families.

Emerging Issues in Public Health

Grades 6–12 • Current Issues

Opioid addiction has reached epidemic proportions. Firearm-related deaths have surged to the highest level in fifty years. Childhood trauma is now considered to be every bit as urgent as a natural disaster or outbreak of deadly disease. These are just three of the issues examined in the *Emerging Issues in Public Health* series. All books explore recent events and new ideas in an effort to explain what's taking place, why it matters, and what efforts are being made to address these and other public health issues. Personal accounts along with facts and quotes from authoritative sources help readers gain a vivid understanding of these issues from a public health perspective.

“This long-running, well-researched series continues to tackle timely and relevant subjects . . . robust choices for those seeking options for current events units or materials to spark debate”

—School Library Journal, September 2015

The *In Controversy* series examines the complex, controversial issues of the day by breaking them into smaller pieces. By studying a specific issue, students gain a more solid and focused understanding of a topic as a whole. Each book in the series integrates facts and contrasting opinions into the narrative for a solid, balanced perspective.

—Booklist, September 15, 2014

7 New Titles

The *Thinking Critically* series introduces students to the complex issues that dominate public discourse and challenges them to become discerning readers, to think independently, and to engage and develop their skills as critical thinkers. Chapters are organized in a pro/con format, in which a single author synthesizes the predominant arguments for and against an issue into clear, accessible discussions supported by details and evidence, including relevant facts, direct quotes, current examples, and statistical illustrations.

The US suicide rate increased 33 percent in the space of just eighteen years. What's more, suicide is now the second-leading cause of death among Americans between the ages of ten and thirty-four. Public health officials warn that suicide has reached epidemic proportions. *The Suicide Epidemic* explores this disturbing trend and its likely causes. The book also examines the phenomenon of teen suicide, the effects of suicide on friends and loved ones, and efforts to reduce suicide.

Underreporting of Suicide

In 2014 the CDC announced that the US had the third lowest rate of suicidal death, as measured by the Global Suicide Self-harm and Suicide Statistics (GSSS) survey. The survey reported that the suicide rate in the US was lower than the rate in the UK, France, Germany, and Japan. The survey also reported that the suicide rate in the US was lower than the rate in the UK, France, Germany, and Japan. The survey also reported that the suicide rate in the US was lower than the rate in the UK, France, Germany, and Japan.

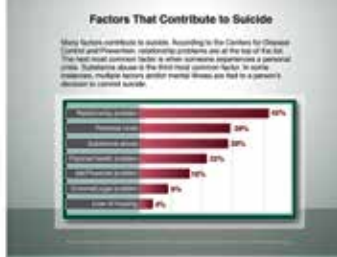

Some minority populations have seasonally high rates of suicide. According to a January 2010 report from the CDC, 34.4 percent of transgender youth—those whose gender identity does not align with their biological sex—reported having attempted suicide in the previous twelve months. Transgender youth make up about 2 percent of the U.S. high school population. Thirty-five percent of these students report being bullied at school, and 67 percent say they feel unsafe at school or traveling to or from campus. Given the violence victimization is a documented risk factor for substance use and suicide risk, implementation of interventions focused on reducing the victimization of transgender adolescents

Abuse from the police were found to assist her. When she was 16, she started having panic attacks. She was assured the police had been very helpful, but she felt that was unfair, and she'd never trusted that to the situation, she would have felt like jumping off the Golden Gate Bridge. Her husband David noticed what was happening. There were no hallucinations, no tinnitus, and he noticed her depression—he was very forthcoming. She said that he would have taken her to the police, but he took her to a psychiatrist, hospital, and so on.

Attention is focused directly on self-concept and/or family pathology, a form of depression studies that studies show might affect as many as two out of every five children and mothers. [As other depressive disorders, common depressive disorders can be caused by changes in the natural chemicals in the brain. One alteration in the levels of the hormones estrogen and progesterone in the mother's body can drop dramatically, triggering changes in mood. Other hormones produced by the thyroid gland may also drop, leaving the new mother feeling tired.

Eventually, Robinson recovered. She and her husband were decided to have a second child. Atkinson did not have depressive psychosis after the birth of her second daughter. Thus, it is possible she had many prefrontal cortex injuries getting enough sleep. "We've got so many messages of just self-medicate," says Robinson. "Do anything for your mind. Drop everything. That's what it takes to be a good mom." Says he, "Just let me, just let what made me a good mom. That's what made me so apart."¹²

Suicide Without Diagnosed Mental Illness

ates, but also that as these problems converge around it, people can begin to feel their problems are insurmountable. They might begin to think about suicide as the only solution and then act on those thoughts.

In this study, the CDC found, for instance, that a physical health problem was a factor in 52 percent of suicides. Among those are people diagnosed with cancer. A 2014 study by researchers at the Penn State University College of Medicine found that people with cancer are more than four times more likely to die of suicide than those without cancer. This rate has doubled since 2005, when cancer patients had a twofold risk of suicide. Since cancer is the leading cause of death in the United States, many people believe that being diagnosed with it is a death sentence. In addition, cancer treatment is often stressful and affects

was already higher than the general population before the tsunami. As a result, women die by suicide at more than 1.5 times the rate of men.

Since 2001, the United States has been involved in wars in Afghanistan, Iraq, and Syria, leaving many veterans with post-traumatic stress disorder (PTSD) and causing rise for suicide.

"War affects permanent psychiatric years in childhood. That trauma can last a lifetime."

ing in grief and guilt, I had to tell myself," he remembers. "Like in many situations, I had found what I desperately needed. The pain faded (he sighs). The lights, sounds and smells of the hospital had been steadily seeping in my head. The suffering wasn't

endless. And so, facing them with no other options of escape, turned to suicide.¹⁴ After surviving his suicide attempt, O'Leary dedicated his life to helping other veterans. He founded an organization, the Independent Fund, that has teamed up with the VA to provide mental health services across the West and other border

Active duty military personnel also have a higher suicide rate than the general population: 77 per 100,000, compared with 14 per 100,000 for the general population. As with veterans, the trauma of combat often contributes to suicide thoughts. "The real problem is the culture in the military that says 'it's up or else' and, if you can't take it up and else isn't, then you're weak and you have to check out," says Dr. Haines, a veteran.

many interest and raise the director of programs and research at the Service Women's Action Network, a national organization

that advocates for active duty and reserve servicemen. "Until we change our culture to say, hey, it's actually strong to be able to recognize your own needs, that that's not a weakness, to be introspective, then we're going to continue to see this problem."

An Occupational Hazard

ventor 2010 study by the CDC found that the suicide rate among the US working-age population increased 34 percent from 2000 to 2010, one percentage point more than the rate for the general population. But some professions have much higher rates than the US average. For example, men working in the construction and mining and petroleum extraction industry occupational group have a suicide rate of 53.2 per 100,000 population, or 2.4 times

11

Introduction

The Recent Surge in Suicides

Creditors make news, and reality shows make even bigger news, so when renowned chef Anthony Bourdain, host of *Chef's Table* (Showtime), *Anthony Bourdain: Parts Unknown* (cable program), and *Man vs. Beast* (ESPN) designer and founder of Man vs. Beast New York told *Time* magazine in June 2015, that doctors diagnosed the foodies as dying. Adding to the shock and grief of his friends, friends, and fans was the manner in which Bourdain and Sarno had died: both had taken their own lives. The public learned that his people who seemed to know everything going for them—wealth, fame, and the admiration of his peers—could not reliably see his life. It seemed to outsiders, in the days and months that followed, that the doctors' diagnosis was wrong. But it was not. Sarno had told the doctors the doctors' diagnosis. According to his family, Sarno had been battling anxiety and depression for years. People close to Bourdain say he was struggling with his family issues.

The same week that AIDS and Boudier got outside in the spotlight, the Centers for Disease Control and Prevention (CDC) released a major report on HIV in the United States. "The CDC found that the US suicide rate had increased among all age groups younger than seventy-five years. 'These findings are disturbing,'" said Anne Schuchter, the CDC's principal deputy director.

And these statistics don't begin to reveal the emotional, social and financial toll that suicide exacts on individuals, families and communities who are left devastated. Many have lost friends, neighbors and family members to suicide or have loved ones who have considered or attempted it.

The couple's divorce was final. Sparks and Anthony diverged to vastly different paths with women, where both women's friends and others were for them.

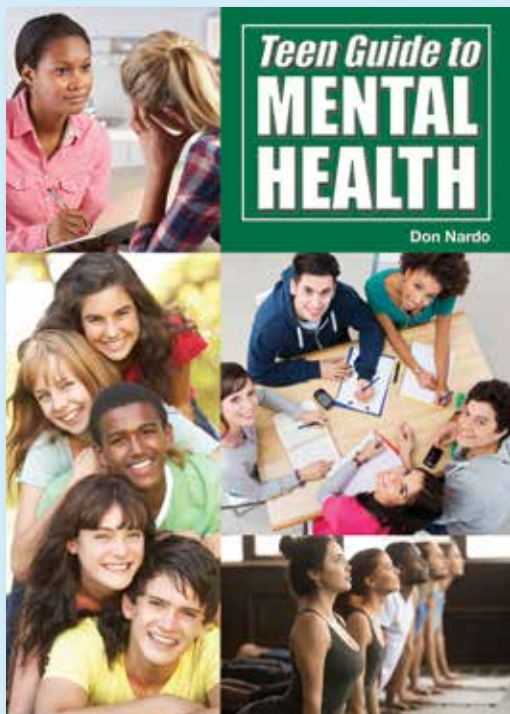

...the world's largest...

One Act, Multiple Causes
One of the most surprising findings of the CDC says that fewer than half of the people who died by suicide had a known mental health condition. For years, mental health professionals had said that 30 percent of suicides are related to mental illness. The CDC found that the actual number of suicides with a diagnosed mental illness was about half that—40 percent. The other 60 percent were people who did not have a mental health condition but were struggling with relationship problems, personal losses, or other life stresses.

The CDC pointed out that both those with a diagnosed mental condition and those without one were almost always facing several problems at once. Usually it there only one factor behind a suicide. For example, a large number of suicides occur among older people who have been diagnosed with a serious chronic. They might be depressed because of the state of their health.

Teen Guide to Mental Health

Grades 6–12 • Health and Drugs

Today's teens face and are expected to deal with a wide array of personal, social, and other issues involving home life, school, dating, body image, sexual orientation, major life transitions, and in some cases physical and mental disorders. *Teen Guide to Mental Health* examines the ways many teens have learned to cope with and survive the often stressful trials and tribulations of modern youth.

Teens and Vaping

The number of young people who practice vaping—the use of e-cigarettes—continues to grow in the United States. Experts are divided about whether vaping is a desirable alternative to smoking cigarettes or is itself a serious health concern. *Teens and Vaping* takes a critical look at this phenomenon and its impact on public health.

Living with Disorders and Disabilities

Living with Disorders and Disabilities introduces students to several mental health issues that are common in today's world. Readers will explore the underlying causes of these disorders and disabilities, the symptoms that result, and the methods doctors use to diagnose them. The books also present the latest research in effective ways to manage and treat these issues. Each volume includes diagrams to enhance readers' understanding of complex concepts, source notes, and an annotated bibliography to facilitate deeper research.

Drug Dangers

Marijuana and heroin are experiencing a resurgence in popularity. Opioid painkillers and synthetic drugs are grabbing headlines, too. The *Drug Dangers* series examines what is taking place today in connection with these and other commonly abused drugs. All volumes clearly and accurately investigate their effects, whether they have addictive properties, the challenges of treatment and recovery, and efforts to prevent their use and abuse. Sidebars, fully documented quotes, organizations to contact for more information, and full-color graphs or maps and photos support the text.

Next-Generation Medical Technology

Grades 6–12 • Science and Technology

“A fascinating look at cutting-edge technology that will likely inspire a few future medical professionals”

—School Library Journal, April 2018

Advances in medical technology are reshaping the practice of medicine and helping people live longer, healthier lives. Genetics research is leading to gene-based treatments that target specific types of cancer. Robots are disinfecting hospital floors, dispensing medication, and assisting with surgeries. Engineers and medical researchers are working with 3D printers to create functioning human organs for transplants. These and other advances offer great promise but also, in some cases, pose difficult ethical questions. The *Next-Generation Medical Technology* series examines all of these ideas and events. Real-world examples, fully documented quotes, and sidebars add insight and interest to this fascinating subject.

The Science of Renewable Energy

Grades 6–12 • Science and Technology

“Timely and informative, these accessible and readable volumes would be useful in social studies and environmental science classes as well as for research and for those with a personal interest in the topics”

—School Library Connection, May/June 2018

The Science of Renewable Energy introduces students to several of today's most important alternative energy sources. Readers will discover the scientific concepts underlying these technologies, learn how they compare with fossil fuels, and explore the cutting-edge research that is going on in each field. The books explore what makes each renewable energy source unique and how each will fit into a diversified energy future. Each volume includes callout definitions for subject vocabulary, diagrams to enhance readers' understanding of complex concepts, source notes, and an annotated bibliography to facilitate deeper research.

The Science and Technology of Sports

Grades 6–12 • Science and Technology

No matter the sport, athleticism and hard work are central to athletic performance. But there is more going on when a person runs, jumps, kicks, or throws. Physical forces and biomechanical factors help determine speed, stamina, accuracy, and more. *The Science and Technology of Sports* series examines the biomechanics, physics, and mathematical principles that shape athletic performance and competition. How these factors influence training and common injuries is also discussed. Real-world examples and fully documented quotes bring concepts to life.

Science has much to offer the world in terms of achieving sustainable practices—in agriculture, water, energy, wildlife habitats, and even construction. *Science and Sustainability* examines the role that science can play in these areas and some of the specific changes that are leading the world ever closer to the goal of sustainability. Fascinating examples and fully documented quotes add insight and interest.

Real-World STEM

Engineering challenges abound in the twenty-first century. Engineers, scientists, and others are searching for—and often finding—ways to improve life for people around the world. Some are working on providing global access to clean water, while others are developing fusion energy or reverse engineering the brain. These and other topics are examined in the *Real-World STEM* series. All books in the series discuss what exists now, some of the biggest challenges, and some of the most fascinating solutions. Real-world examples and fully documented quotes add insight and interest.

“The discussions of benefits and risks are even-handed and give readers a nuanced take on the outlook for the technology. . . . Recommended”

—School Library Connection, Jan/Feb 2019

Technology's Impact explores how cutting-edge technologies will affect society in the future—both positively and negatively. Readers will learn how these technologies work, how they are already affecting today's world, and how researchers are working to unlock the opportunities of these advances while avoiding the potential pitfalls. The books look ahead to the future, charting the likely paths of these technologies. Each volume includes callout definitions for subject vocabulary, diagrams to enhance readers' understanding of complex concepts, source notes, and an annotated bibliography to facilitate deeper research.

The Future of Technology

Grades 6–12 • Science and Technology

Bold, new technological marvels in nanotechnology, 3D printing, artificial intelligence, and other areas are likely to make for a fascinating future. *The Future of Technology* series explores what lies ahead as scientists, engineers, and others seek to develop the technologies that will, in all likelihood, alter the future course of human civilization. Visual chronologies, sidebars, vocabulary terms, fully documented quotes, and full-color photographs add depth and insight.

How Science Changed the World

Grades 6–12 • Science and Technology

“Well-researched and engagingly written, excellent resources for independent reading and focused inquiry”

—School Library Journal, November 2018

Scientific discoveries and inventions have the power to change lives. Some—such as electricity, automobiles, and the Internet—have altered the world in innumerable ways. The new series *How Science Changed the World* explores some of the greatest scientific and technological achievements in human history—along with the changes (positive and negative) brought about by these innovations. This series is a mix of science and technology, history, and social history—on a global scale.

Historic Disasters and Mysteries

Grades 6–12 • History and Culture

The mysteries and disasters of the past never grow old. Why the *Titanic* sank, how a volcanic eruption buried an entire city, what happened to an entire civilization (if, indeed, it ever existed), and the bizarre events surrounding a dramatic discovery in the desert still fascinate. These are the subjects explored in the *Historic Disasters and Mysteries* series. Each book explores what happened and why, what evidence exists to support these ideas/scenarios; the individuals involved; and the aftermath. Personal accounts, the observations of experts, and interesting facts add depth and perspective.

During and perpetuating this legend have been well over two thousand books and numerous scholarly articles, along with many short stories, novels, and movies. These accounts have explored a myriad of theories to explain Atlantis' sudden disappearance. Moreover, they have placed it not only in the Atlantic Ocean, as Plato did, but also in various other locations around the globe. In the words of the late Irish historian J.B. Luce, "Atlantis has been sought literally from Canton [St. Louis] to Mexico, and there are no more than half a dozen who claim to know where it began."

Atlantis Sinks Again?

Attempts to place the lost continent in diverse locations actually did not begin until many centuries after Plato wrote his book. In the 15th century, the Italian explorer Christopher Columbus was looking for a new route to the East Indies. He was looking for a new route to the East Indies. He was looking for a new route to the East Indies.

Bull Leaping: A Serious Religious Ritual

Major bull leaping rituals were held in Minoan religion. In this ceremony, a bull was killed and its head was used as a trophy. The bull was then used in a variety of ways, including as a sacrifice to the gods. The bull was also used in a variety of ways, including as a sacrifice to the gods.

Plato's account of Atlantis is a fascinating story. It is a story of a powerful civilization that was destroyed by a great disaster. The story is a warning to us about the dangers of power and ambition. It is a story that has inspired many writers and artists throughout the centuries.

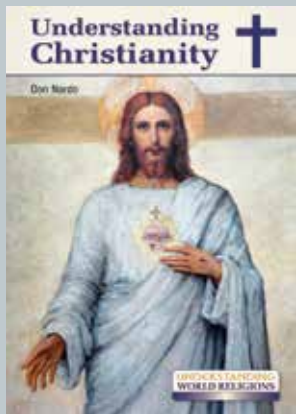

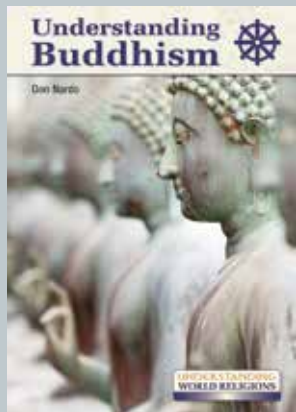

Atlantis is a story of a powerful civilization that was destroyed by a great disaster. The story is a warning to us about the dangers of power and ambition. It is a story that has inspired many writers and artists throughout the centuries.

Atlantis is a story of a powerful civilization that was destroyed by a great disaster. The story is a warning to us about the dangers of power and ambition. It is a story that has inspired many writers and artists throughout the centuries.

Understanding World Religions

Grades 6–12 • History and Culture

“A well-written and thought-provoking series”

—*School Library Journal*, November 2018

To truly understand the world's major religions one needs to understand what people within each faith believe, how they practice their faith, and what rules they live by. The *Understanding World Religions* series explores these important aspects of religion as well as the origins of each faith and some of the challenges they face in the modern age.

By the time Spotify began to offer a different model of music service, Warner Music Group had already released more than 100 albums. Warner's new service charged users a set fee per month, in exchange for that fee, users could stream an unlimited amount of music from the company's catalog. Subscribers to these services are once again shifting the way people listen to music. At a 2016 article in the *New York Times*, the author discussed how this might change the music industry: "This shift has the potential to reshape both the music people listen to and the music that artists create. For example, will the concept of albums survive in the age of streaming, or will artists simply release their best songs?"

Not everyone has jumped on the streaming bandwagon. A smaller yet sizable part of the population in the twenty-first century has decided to embrace vinyl albums once again. Interest in these old-fashioned records has not been strong enough to prompt a number of artists to release new music in this format as well. Although one might assume that it's nostalgic, older generations who are responsible for this resurgence. It is actually people aged eighteen to twenty-four who are buying vinyl back. According to *Forbes* magazine, one of four people in this age range bought a vinyl record in 2017. Some like the way vinyl records sound, while others prefer the ritual of placing a record on a turntable over simply hitting "play" on a computer.

Biopunk Thrives as a Solo Artist

It would be impossible to select just one artist who defines the music of the twenty-first century, but if there were to be a list of the top contemporary, Biopunk would surely be on it. During her time as a member of the R&B trio Destiny's Child, Biopunk's knowledge launched

Growing Up Around the World

Grades 6–12 • History and Culture

“Teens will find relatable information about the lives of their global peers in this set. . . . This series will draw an audience beyond report writers”

—School Library Journal, November 2017

What is it like to grow up in India or Mexico or Iran or any number of other countries around the world? ReferencePoint's *Growing Up Around the World* series presents a vivid and realistic picture of how kids grow up in different countries. Do they spend hours on social media? Do they share a house with many family members or just a few? Do they go to college? Do they get caught up with drugs and alcohol? Where do they go when they go out with friends? A mix of firsthand accounts, facts, and other insights helps provide readers with an understanding of other cultures. Every book includes an overview of the country along with discussion of home and family, education and work, social life, and more.

The Push for Social Change

Grades 6–12 • History and Culture

“Excellent additions to history shelves”

—Booklist starred review, December 1, 2018

Social change can occur slowly and quietly, but it is often the result of large numbers of people mobilizing for the purpose of bringing about change. *The Push for Social Change* series explores how and why social change occurs and what impact major movements have had on people's lives. All books examine the events that led to particular social change movements, what those movements did, how and why they did it, and the short-term and long-term impact of those movements. Quotes from people on all sides of these events add insight and interest to the discussion.

Top Ten
Series!**

Much of what is known about people's everyday lives in times past comes from artifacts but also from diaries, letters, and other writings. Many important details of life during the Civil War, for instance, can be found in the diaries of women who carried on while their men were at war. In the *Living History* series, firsthand accounts such as these are combined with thoughtful narrative to offer a rich and vivid portrait of daily life in various times and places in history.

History and Culture Single Titles

Were Native Americans the Victims of Genocide?

2018

(eBook)

978-1-68282-291-3 (292-0)

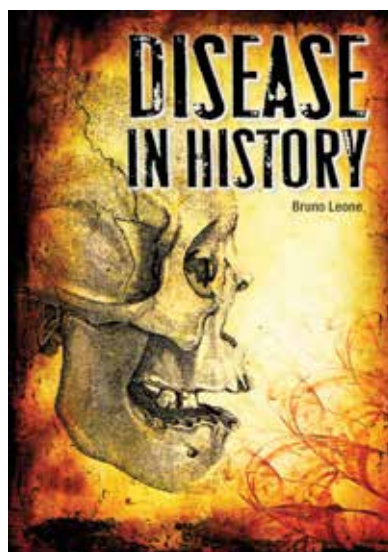

Hardcover: List ~~\$44.25~~

School & Library \$30.95

eBook Multiuser: \$41.95

specifications: • interest level grades 6–12 • 80 pages, 6.5 x 9.25 • reinforced library binding • full-color photos • sidebars • margin quotes • source notes • for further research section • index

European destiny in the Americas came at the expense of the Native peoples. On this point, most knowledgeable people would agree. Where there is disagreement is in determining the intent of the white Europeans who sought to make the Americas their new home. The question of intent, still contentious today, is the focus of the new book *Were Native Americans the Victims of Genocide?*

Disease in History

2016

(eBook)

978-1-60152-960-2 (961-9)

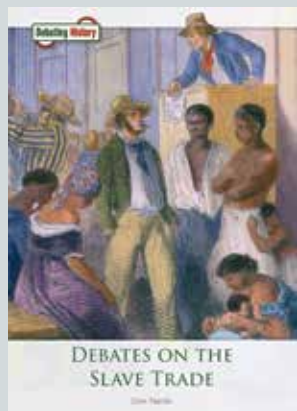

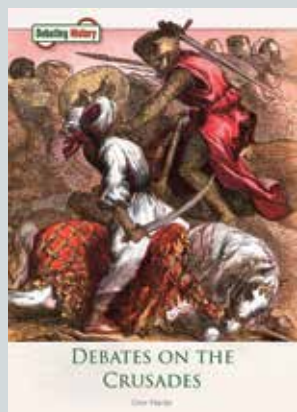

Hardcover: List ~~\$44.25~~

School & Library \$30.95

eBook Multiuser: \$41.95

specifications: • interest level grades 6–12 • 104 pages, 6.5 x 9.25 • reinforced library binding • full-color photos and maps • visual chronology • sidebars • source notes • for further research section • index

Disease in History describes several of the epidemics that have significantly influenced historical events. It describes how the discovery of germs in the past two centuries was able to reverse millennia of superstition and ignorance in the treatment of infectious diseases. Finally, it explains how and why the world of microbial organisms has been able to thwart many of medical science's greatest efforts to eliminate or, at the very least, control them.

“An exceptional series that could presumably grow from the cornerstone topics it has already featured. Purchasing these titles would benefit middle school and high school libraries. Highly recommended”

—School Library Connection, Jan/Feb 2019

With the passage of time, the controversies that shaped historic events sometimes fade. The *Debating History* series focuses on those controversies as a way to gain a fuller understanding of history. Chapters are organized in pro/con format, in which a single author synthesizes arguments for and against a particular issue. Some of these essays are written from the point of view of someone who lived during the period; others are examined from a more modern perspective. In all cases, important ideas are supported by relevant facts, quotes, and examples. Focus questions at the beginning of each essay provide added critical thinking exercises for students.

The World of Video Games

Grades 6–12 • Arts, Sports, and Entertainment

“A readable and useful overview for longtime gamers or newcomers to the sport”

—Booklist, April 1, 2019 on *E-Sports and the World of Competitive Gaming*

The World of Video Games explores the many topics and controversies in the video game industry. Readers will learn about such topics as the history of video games, breakthrough technologies, and the rising popularity of E-Sports. They will understand how video games affect both individual people and society. The books look ahead to the future, charting the likely paths of the video game industry. Each volume includes diagrams to enhance readers' understanding of complex concepts, source notes, and an annotated bibliography to facilitate deeper research.

CHAPTER 4 THE FUTURE OF E-SPORTS AND COMPETITIVE GAMING

The future of E-Sports and competitive gaming will remain closely linked to advances in gaming technology and its spread around the globe. A 2018 movie gave a glimpse of what this future might look like. The *Ready Player One*, based on a 2011 science fiction novel, is set in 2045. The real world has become a harsh place, so Wade Watts and his friends escape to the popular virtual world of the OASIS. Within it

VR is changing the face of video games. Some E-Sports may become VR games in the future.

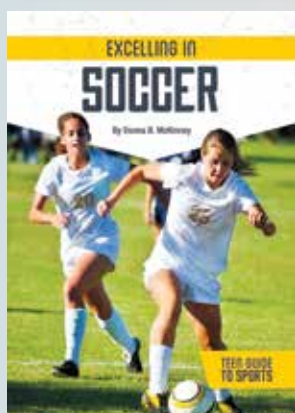

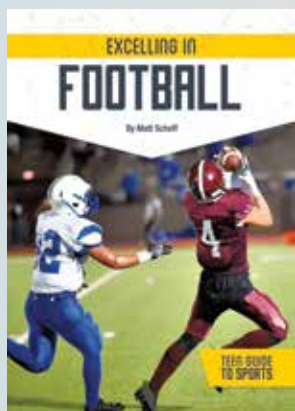

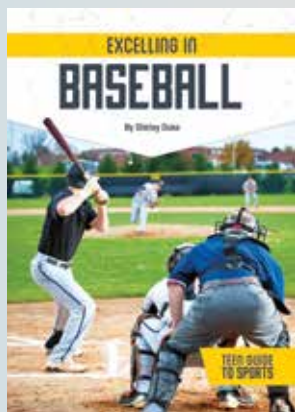

As of September 2018, E-Sports players who were twenty-two years old had earned the highest earnings by age at over \$100 million. They were also one of the largest groups, totaling 1,442 players. The largest group of players was twenty-year-olds, which totaled 1,047 players. However, the number of players per year after that drops dramatically. For example, there were only 160 players between ages 25 and 29, and only 12 players between ages 30 and 35. The group of 30-year-olds only made \$10,700 in earnings in 2018.

According to Dr. Jane T. Austin of Florida State University, "It is not uncommon for E-Sports professionals to retire from competitive play at an age of 18, increasingly choosing to pursue careers elsewhere in the entertainment industry. That one reason for the drop-off in both earnings and number of players is that 'professionalized and amateur video gaming is physical and mental exhaustion'."

Source: T. Austin, "Gaming Industry Overview and the Changing Competitive Gaming Professionalism," *Journal of Management Education*, Volume 42, Number 2, 2018.

Teen Guide to Sports

Grades 6–12 • Arts, Sports, and Entertainment

Teen Guide to Sports introduces the worlds of basketball, hockey, football, soccer, and baseball to high school athletes. Readers will learn about tryouts, exercises and drills, what coaches are looking for in players, and what life is like in collegiate and professional sports. Each volume includes quotes from professionals in the sport, informational sidebars, and source notes to facilitate deeper research.

The music world is ever changing. Although classical, rock, and jazz still have strong followings, many of today's musicians are making names for themselves in other music styles, including K-pop, EDM, and rap and hip-hop. The *Music Scene* series focuses on what today's new musicians are doing, what they seek to convey through their music, and how they are using new techniques and technology to create and promote their work. Each book introduces readers to influential musicians and presents brief historical background as well as highlighting the work of a variety of contemporary musicians and their music.

The art world is ever changing. Although painting and sculpture still have a strong following, many of today's artists are making names for themselves in other art forms, including animation, tattoo, and even graffiti. The *Art Scene* series focuses on what some of today's new artists are doing, what they seek to communicate through their art, and how they are using new techniques and technology to create and promote their work. Each book introduces readers to influential artists and presents brief historical background as well as highlighting the work of a variety of contemporary artists and their art.

"The writing is simple and readable. . . . These are solid offerings for laying out the basics"

—School Library Journal, February 2015

The *Discovering Art* series introduces readers to major art forms, styles or movements, and periods. Books in the series discuss early development and pioneers; important changes over time in style, tools, and techniques; influential artists; and more. The series serves as an excellent starting point for student researchers and anyone hoping to develop an appreciation for art in its many forms. Sidebars, vocabulary terms, and fully documented quotes add depth and information to the text.

The Library of Tattoos and Body Piercings

"These books are well written, well researched, and engaging. Reluctant readers will be drawn in by the snappy, funny sidebars and clear photos, which are gorgeous and, at times, gory"

—School Library Journal, November 2013

Tattooing and body piercing have existed in some form or other for thousands of years. In cultures around the world the body has been used as a canvas for personal adornment, art, identification, religious marking, spiritual protection, and more. But tattoos and body piercings are hardly a thing of the past. In fact, both have experienced a resurgence in recent years, particularly among teens and young adults. *The Library of Tattoos and Body Piercings* explores this fascinating topic from various perspectives, including history, art, health, and teen views and concerns.

A lot of teens have no idea how to dress for a job interview or how to arrange for utilities in a newly rented apartment or how to avoid running up a huge credit card bill. The *Teen Life Skills* series provides teens with a solid and practical introduction to, well, real life. Real-world examples, relevant facts, and fully documented quotes from teens and experts bring concepts to life for a down-to-earth look at topics including managing money, living on your own, and getting a job.

“These are terrific additions to any school library”

—*School Library Connection*, November 2016

Having a solid understanding of credit and debt, saving and investing, and how to pay for college is essential for today's teens. The *Teen Guide to Finances* series walks teens through these and other topics (including how to start a business) in clear, straightforward language. All volumes feature real-world anecdotes; quotes; and listings of informative books, online tools, and apps to further a young person's knowledge of money and finances.

Career Discovery

Figuring out what career to pursue is no easy feat, but here's one way to go about it: Follow your passion. Do you like animals? Consider a career as an entomologist, veterinarian, or fish and game warden. Do you like helping people? Consider a career as a nurse-midwife, adult literacy teacher, or social worker. The *Career Discovery* series shows students how their passions can play a big role as they ponder future careers. All books in the series profile a variety of jobs and career fields that are well-suited to particular interests. Included in every book are comments from industry insiders, information about pay and job prospects, a Q&A interview, and a list of sources for more information.

Careers in Engineering

“A handy reference for teens thinking of engineering as a possible career choice”

—School Library Journal, November 2018

Engineering is a top career field, but differentiating between one engineering discipline and another is not always easy. The *Careers in Engineering* series provides easy-to-use guides for teens who are trying to understand the differences between various engineering careers and which of these careers might match their interests, skills, and talents. Each book focuses on a single discipline, such as biomedical engineering or electrical engineering. What the job entails, what it pays, and future prospects are discussed along with insights from industry insiders—and a Q&A interview with a professional in the field in every book.

and how to set up hardware such as speakers, audio interface, and more.

Composers also need to be flexible and remember that they're producing work not for themselves but for a company or a client. This means they can't have full creative control over the music they produce, whereas writers, who compose scores for the Harry Potter and Lord of the Rings games, often do. It's essential to be accepting and open to feedback. As he says in *Diapers Don't Make Me a Girl* (the latest Game Boy Advance title), "You're not the final on the GamePad!" In reality, it's always good to debate the purpose of music, but nobody wants to contest with producers or managers when working on a project, so composers have to be flexible enough to accept. The best composers, he says, who play their cards well and want to work well, however satisfied they become."

200

Audio Engineer

What's Does an Audio Engineer Do?

Audio engineers mix audio games with sound. They use software and special software programs to turn everyday sounds into those that can be featured in video games—such as taking the sound of a dropped coin and turning it into a bank clunk.

turning things like bank clunks into a design tool. Audio engineers both construct new sounds and use sounds that are found already, which is a component of audio design in video games.

The process of finding, given, and recording sounds begins after a discovery meeting with a game's designers, in which all of the audio requirements for the game are defined. Then the audio engineer mixes the sound effects already in the game, such as the sound of a coin being dropped, into the game's audio.

Next, the audio engineer creates new sounds for the game, such as the sound of a coin being dropped, into the game's audio. The audio engineer then mixes the sound effects already in the game, such as the sound of a coin being dropped, into the game's audio.

Employees

Large video game companies offer a lot of great jobs for employees in this work. Such companies typically develop software and distribute games (AAA games) that have higher-quality value and are made with more budget than those that employ smaller companies. While salaries, independent game developers have less money to work with, companies who work for these developers tend to be given a lot of responsibility, some- times your own.

Employees in game development work for a company or a client. This means they can't have full creative control over the music they produce, whereas writers, who compose scores for the Harry Potter and Lord of the Rings games, often do. It's essential to be accepting and open to feedback. As he says in *Diapers Don't Make Me a Girl* (the latest Game Boy Advance title), "You're not the final on the GamePad!" In reality, it's always good to debate the purpose of music, but nobody wants to contest with producers or managers when working on a project, so composers have to be flexible enough to accept. The best composers, he says, who play their cards well and want to work well, however satisfied they become."

Workers

Workers who work in the video game industry are typically paid hourly. They are not given a lot of responsibility, some- times your own.

series specifications: • interest level grades 6–12 • 80 pages, 6.5 x 9.25 • reinforced library binding • full-color photos and charts • at a glance facts • sidebars • 8 jobs profiled in every book • Q&A interview • list of other jobs • websites to find out more • index

A lucky few know exactly what kind of work they want to do someday. But what about all the others who know what they like (history, math, writing, etc.) but have no clue what job or career to pursue? The *Finding a Career* series offers students another way of thinking about jobs and careers: by considering their interests and the skill sets they have developed in connection with those interests. Books in this series profile a variety of jobs and career fields that are well suited to particular interests. Included in every book are comments from industry insiders, information about pay and job prospects, a Q&A interview, and a list of sources for more information.

Military Careers

Teens who are trying to decide if the military is for them will find a useful tool in this easy-to-use series of reference guides. Each book in the *Military Careers* series focuses on a different branch of the military and introduces students to specific jobs representing an array of career possibilities. All books cover what the jobs entail, working conditions, educational and physical requirements, opportunities for advancement, employment prospects in the civilian world, and more. Perspectives from those who serve in these jobs, including a Q&A interview in each book, provide readers with a realistic depiction of life and work in the military.

What makes a great job? It can be different things for different people. To some, a great job is one that offers deeply satisfying work. To others, a great job is one that pays well. To still others, a great job inspires creativity. Or maybe a great job does all of those things—and more. Teens who are contemplating their career choices will find useful descriptions, essential facts, and valuable advice in this easy-to-use series. *Great Jobs* introduces readers to a variety of jobs within a given field and explores what the jobs entail, educational requirements, salary ranges, required skills, employment prospects, and more. All books in the series feature a Q&A interview with someone who works in the field. Lists suggesting sources for more information are also included in every book.

Donald Trump: 45th US President

Grades 6–12 • Biographies

The 2016 election season was like no other. Billionaire and international celebrity Donald Trump dominated both the primaries and the general election. His reputation—as a negotiator, salesman, reality show host, and builder of glittering skyscrapers, golf courses, and casinos—set him apart from all of the other candidates. His campaign set him apart as well. He commanded public and media attention via Twitter. He uttered what many considered to be outrageous statements—offending some Americans with his comments about women, Mexican immigrants, and Muslims, and horrifying others with his support for seemingly discredited theories. He also spoke about the need for jobs and recapturing a way of life that seemed, to many of his supporters, to be slipping away. In Trump's campaign appearances, interviews, speeches, debates, and tweets, the recurring themes were: anger, frustration, and disillusionment—a world and a way of life gone awry.

Donald Trump broke all of the rules of traditional political campaigns. Few, even in his own party, thought he would win. But he did. *Donald Trump: 45th US President* explores Trump's early life, his formative years, his career, and the campaign that brought him into office as America's 45th president.

Influential Women

Scientist Marie Curie conducted groundbreaking studies on radiation in the late 1800s and early 1900s. More than a century later, Pakistani teenager Malala Yousafzai overcame cultural obstacles and a bullet to the head to speak out about the need for education for young women. These two women lived in very different times and places, but their accomplishments, though not at all similar, have influenced people worldwide. *Influential Women* examines the lives and achievements of some of the world's most fascinating women. Through their own words, and the words of those who have known or studied them, emerge life stories that are well worth reading about again and again.
