CLOSE-UP

Natural raincoats

A panda's coat has two layers. The outer layer is long and coarse. Beneath this is a dense, woolly layer. Panda fur is slightly oily, which prevents water from soaking the animal's skin.

Spotlight on Nature

Books about animals have nearly universal appeal—especially when the spotlight is placed on the wild families that make up the natural world. *Spotlight on Nature* is tailored for readers wanting to know more about their favorite creatures than a simple picture book or encyclopedia article can tell them, and the narrative feature interspersed throughout the informational text will attract fans of classic nature shows.

Ancalagon the Black Ancalagon the Black is a huge dragon. He is from J. R. R. Tolkien's series *The Lord of the Rings*. He led an army of dragons in a fight against a group of elves. Ancalagon was defeated in the battle. As he fell, his body crushed three mountains. This means Ancalagon was probably bigger than Balerion! But Tolkien does not reveal the dragon's exact size in any of his writings.

The fused jaws of anteaters, the permeable skin of salamanders, and the defining characteristics of various other fascinating animals are explored in the *Living Wild* series. Vivid photographs help take readers on a virtual field study to observe the life cycle and behaviors of each featured mammal, bird, fish, amphibian, or other creature. Each book also looks at past and present scientific research and includes a unique storytelling element in the form of an animal tale drawn from mythology or folklore. Progressively complex text draws readers into this interdisciplinary life science series.
